

JOHNSON LUMBER

Douglas Fir Product Information

5/8" x 6" CVG WP4ECB

Product Specifications

- **Species:** Douglas Fir
- **Profile:** WP4ECB
- **Grade:** CVG (Clear Vertical Grain)
- **Nominal Size:** 5/8" x 6"
- **Face Coverage:** 5.125"
- **Actual Thickness:** 5/8"
 - Counted as **1" lumber** for industry sizing and pricing purposes

Length Information

- Sold in **random lengths**
- Lengths are **16' and shorter**
- Units contain a mix of **odd and even lengths**
- Estimated footage distribution: **3'–16'**
- Units typically contain a **higher percentage of longer lengths**

Profile Details

- **ECB side = Face**
- **WP4 side = Back**

Important Notes

- **No end-matching**
- The WP4 side is intended to be the backside and may contain up to **5% waste**
- Johnson Lumber will **not run WP4 as the face**
- If using the WP4 side, customers should **order additional material** to account for the expected waste factor

Definitions

CVG (Clear Vertical Grain)

Premium-grade lumber with a straight, vertical grain pattern and minimal defects, providing superior appearance and stability.

WP4ECB

Edge & Center Bead (ECB) face and WP4 back profile.
