- When using the Nickel Gap side as the face, customers should plan for a waste factor of up to **10%**, though waste is typically less

Definitions

STK (Select Tight Knot)

A high-quality knotty cedar grade featuring tight, sound knots and a premium appearance. Comparable to EWP Premium grade.

WP4

A traditional v-groove tongue-and-groove profile commonly used for wall and ceiling applications.

Nickel Gap

A tongue-and-groove profile designed with a consistent nickel size reveal between boards, creating a clean, modern appearance.
